Algorithm to find Best match [offer practice with buyer doc]

7 am

1st we can show All upcoming offers with all default filter.

1st state filter

We can filtered ~~state~~ offer with Doc's State [view only selected state offer]

2nd dist filter

We can filtered offer with Doc's Dist [view only selected dist offer]

3rd city filter

We can filtered offer with Doc's city [view only selected city offer]

4th filter pincode

We can filtered offer with Doc's pincode [view only Entered pincode offer]

5th filter speciality

We can filtered offer with Required speciality [view only selected speciality offer]

Birthday/anniversary

Two heads are better than one. But not if both are stupid.

JULY

30

Wednesday

2014

Week 31 Day 211-154

Using these all filter we can match perfect offer practice with buyer doctor

We can filtered offer with Required price Range [view only offer within Req price Range]

6th filter price range

We can filtered offer with Required date (both) [view only offer within both Req Date]

7th filter date

We can filtered offer with Required Degree [view only selected degree offer]

8th filter degree

It's not the size of a weapon that matter, but fury of the attack

31 JULY

Thursday

19 We can achieve Best match using SQL Algorithm

For that we can use dynamic SQL Where condition.

Query: Select * From tbl_offer (where)

This where is dynamic or followy.

1. If (@State = 'ALL')

then set @where = null

else set @where = Stateid = '1'

2. If (@Dist = 'ALL')

then set @where = @where + null

else set @where = @where + distid = '1'

3. If (@City = 'ALL')

then set @where = @where + null

else set @where = @where + Cityid = '1'

Happiness comes from within, it can never come from outside.

4. If (@Pincode = null)

then set @where = @where + Pincode = '1234'

5. If (@Degree = 'ALL')

then set @where = @where + null

else set @where = @where + Degreeid = '1'

6. If (@Speciality = 'ALL')

then set @where = @where + null

else set @where = @where + Specialityid = '1'

7. If (@FromDate = null & @ToDate = null)

then set @where = @where + null

else set @where = @where + FDT = '05/01/2024' and TDT = '05/01/2024'

8. If (@Compare = 0) Final where small filter.

Select * From tbl_offer where
 @Stateid = '1' and @Distid = '1' and @Cityid = '1'
 and @Pincode = '1234' and @Degreeid = '1'
 and @Specialityid = '2' and @FDT = '05/01/2024' and
 @TDT = '05/01/2024' and @minprice = 0 and @max = 1000.
